

Advanced Air Traffic Flow Management Seminar November 6-7, 2013

FAA
Air Traffic Organization

Air Traffic Control System Command Center

Seminar Agenda	
Wednesday, November 6, 8:00am - 4:30pm	
8:00am-8:30am	Welcome
8:30am-9:30am	The Evolutionary Implementation of ATFM
9:30am-10:30am	ATFM Collaborative Decision Making (CDM) the Operating Paradigm
10:30am-11:30am	Essential Elements of NextGen ATFM
11:30am-12:30pm	Lunch
12:30pm-1:30pm	Industry Perspective –The Case for NextGen Near-Term Benefits
1:30pm-2:30pm	Time Based Flow Management (TBFM)
2:30pm-3:30pm	Surface Operations: Gate to Threshold
3:30pm-4:30pm	ATFM Weather Programs
Thursday, November 7, 8:00am - 4:30pm	
8:00am-9:00am	Collaborative Air Traffic Management (CATM)
9:00am-10:00am	National System Efficiency
10:00am-11:30am	Unmanned Aircraft Systems (UAS) Integration to the NAS
11:30am-12:30pm	Lunch
12:30pm-1:30pm	Commercial Space Accomplishments
1:30pm-3:00pm	Security in the National Airspace System
3:00pm-4:00pm	Global ATFM Developments
4:00pm-4:30pm	Summary and Closing

Seminar Description

During this two-day seminar, you will learn the significance of applying Traffic Flow Management in a system-wide manner to ensure a safe, orderly, expeditious, and economic flow of air traffic. This diverse group of aviation professionals will engage in lectures and open discussions of the evolutionary nature of ATFM in order to manage today's changing environment as well as exploring the roles and relationships of the various entities influencing the daily operation of the National Airspace System.

Cost

Non-FAA – \$650.00
